

### SUPPORT FOR THE ENTIRE GRANT LIFECYCLE

The Universal Design Platform as a Service (UDPaaS) Grants Management System (GMS) is a full-featured Software as a Service (SaaS) product supporting the full grant lifecycle:

- Program Definition
- Opportunity Management
- Goal Management
- Application Intake

- Compliance Check (Due Diligence)
- Grant Review
- Grant Award
- Grant Payment

- Grant Monitoring
- Progress Reporting
- Impact Analysis

Our solution enables application designs that optimize business processes tailored to any business need in any market. Requirements can be transformed into applications in weeks or months as custom coding is not necessary.

#### **SUPPORTED BUSINESS FUNCTIONS:**

## WHO WE CAN HELP:

Grantmakers in government & private organizations

# **FUNCTION AND FEATURES:**

- 1. Provides real-time visibility to an agency's grants programs & budgets
- 2. Consolidates grant information into a single integrated system of record
- 3. Allows for efficient & effective management of the grant lifecycle through visualizations & shortcuts
- 4. Contains reporting, data analysis, & dashboards used to analyze impact & outcomes

## **HOW TO BUY CMS:**

GSA 8 (a) STARS III | GSA MAS | FAA eFAST | SeaPort NxG | NIWC IDIQ | SOSSEC OTA

- 5. Allows impact areas to be analyzed geographically
- 6. Facilitates signing grant agreements with e-signature
- 7. Allows for reviews through the grant rubric review form
- 8. Connects with APIs integration
- 9. Uses version control to build new features without interrupting live production
- 10. Limits access upon business demands with role-based system

### **BENEFITS:**

- 1. Allows for open cycles & targeted invitations for potential grantees & partners via portals
- 2. Supports compliance & auditing, such as Single Audit, through data capture forms, dashboards, & reporting through a variety of parameters so societal impact can be measured
- 3. Enables a customizable & configurable grantmaking process to suit your grantmaking needs & specific business processes

UDPaaS BUSINESS VALUE

- Unified Cloud-Native Platform: Supports multiple lines of business at once with an intuitive, effective, and efficient interface and experience.
- Modernization & Intelligent Automation: Empowers organizations through efficient and intuitive user interface and robust workflow automation.
- Government Compliant: Meets the need and security demands of government agencies through role-based access control (RBAC) permissions and single sign-on authentication.
- Scalable & Cost Efficient: Can easily and efficiently be expanded by using no code, low code capabilities resulting in a lower cost of ownership
